## Update Regarding COVID-19

March 15, 2020

To our valued patients:

As you are aware, the spread of COVID-19 is an increasing public health threat to our community. We want to assure you that at Assured Imaging, the health and safety of our patients and employees is our top priority and that we are taking all necessary precautions to ensure the well-being of our patients and our staff. We are closely monitoring the CDC and local health department updates and recommendations and are taking several steps to help mitigate the risk of disease transmission. We wanted to outline a few of the precautions that we have been taking as a company at our imaging centers and with our mobile mammography and ultrasound services:

All staff has been instructed to wash or sanitize their hands between each patient. We are also ensuring that all imaging equipment gets properly sanitized between each patient.

**If you or your loved ones have active symptoms of COVID-19, including:**

- **Fever**
- **Cough**
- **Shortness of breath**

**Please call us to reschedule your appointment out 2-3 weeks from today. While we recognize that this may be an inconvenience, this is necessary for us to ensure the safety of our staff and other patients.**

We want to preserve the integrity of our centers to be able to provide the highest quality of care for all of the other medical imaging needs we take care of on a daily basis. We are continuously assessing and implementing procedures to ensure that we can continue to provide important outpatient imaging services to our community as the hospitals and acute care facilities will undoubtedly become overwhelmed with caring for COVID-19 patients. Our national leadership team has created a task force that meets daily to follow any changes in this dynamic situation to ensure that we are staying up to date as the situation evolves. We appreciate your understanding and cooperation during this challenging time.

Best regards,
